

ABSTRACT OF THE DISCLOSURE

A speaker device 10 includes a first vibration system 12 that is connected to a diaphragm 24, and a second vibration system 13 that is driven in a contrary direction to the first 5 vibration system 12. A magnetic circuit 11 is composed of a first plate 15, a second plate 18, a yoke 16, and a magnet 17, in which the first vibration system 12 has a first voice coil 20 connected to the diaphragm 24 and a frame 25, and the second vibration system 13 has a second voice coil 21 connected via 10 a second damper 36 to the frame 25.
